How to Solve a Maze

1. Find the entrance — usually marked with an arrow or opening on the edge of the maze.

2. Trace a path from the entrance toward the exit. Try to look ahead and plan your route before committing.

3. When you hit a dead end, backtrack to the last junction and try a different path.

4. Wall-following technique: Place your hand on one wall and keep it there as you walk. This will eventually lead you to the exit in most mazes.

5. Solutions are provided at the back of this book if you get stuck.

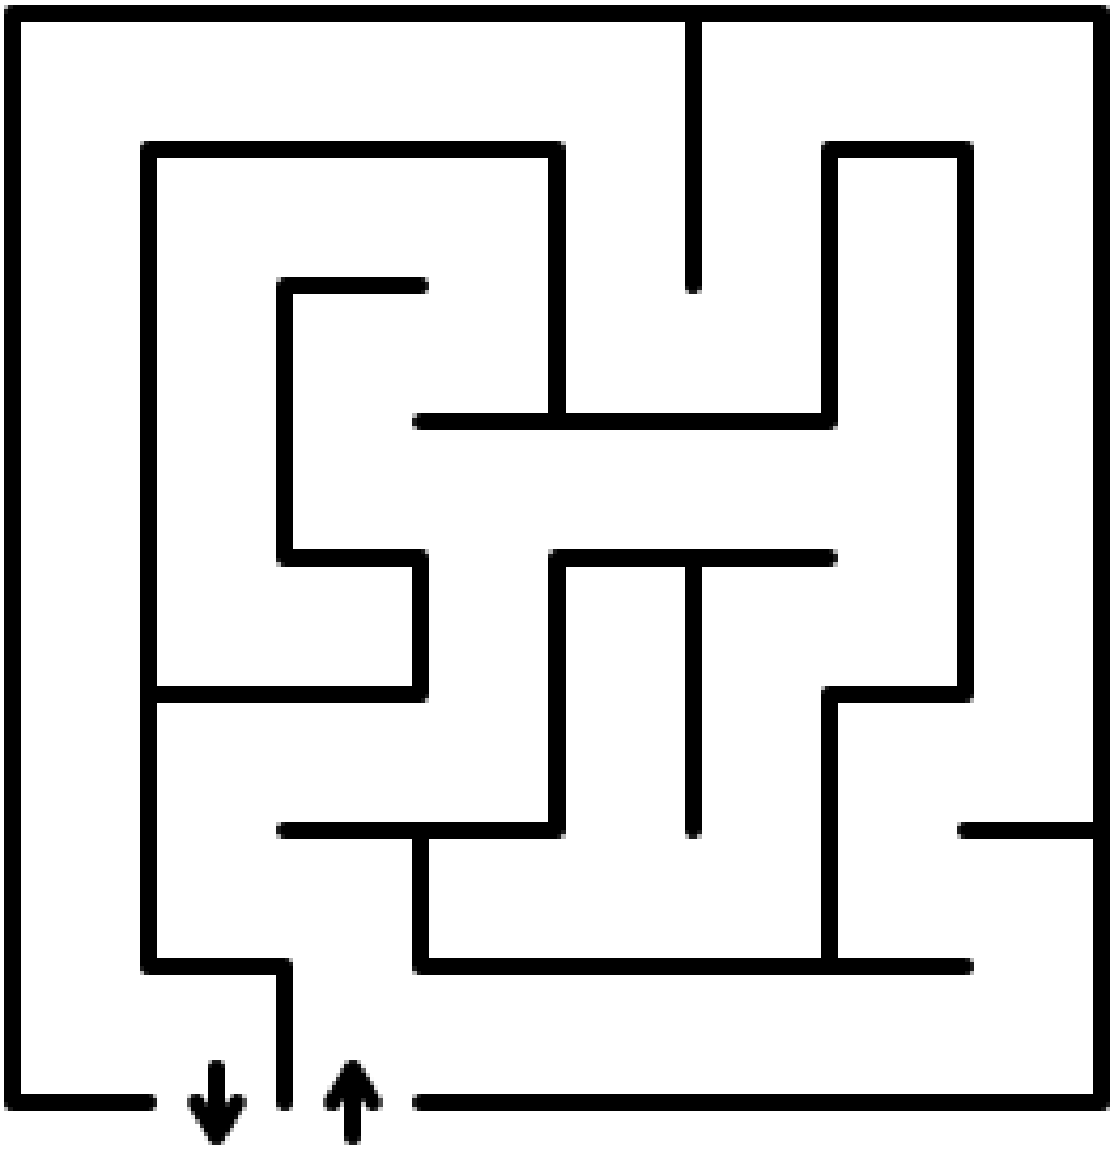

Tips for Success

- Start from the exit and work backwards — sometimes the solution is easier to see in reverse.

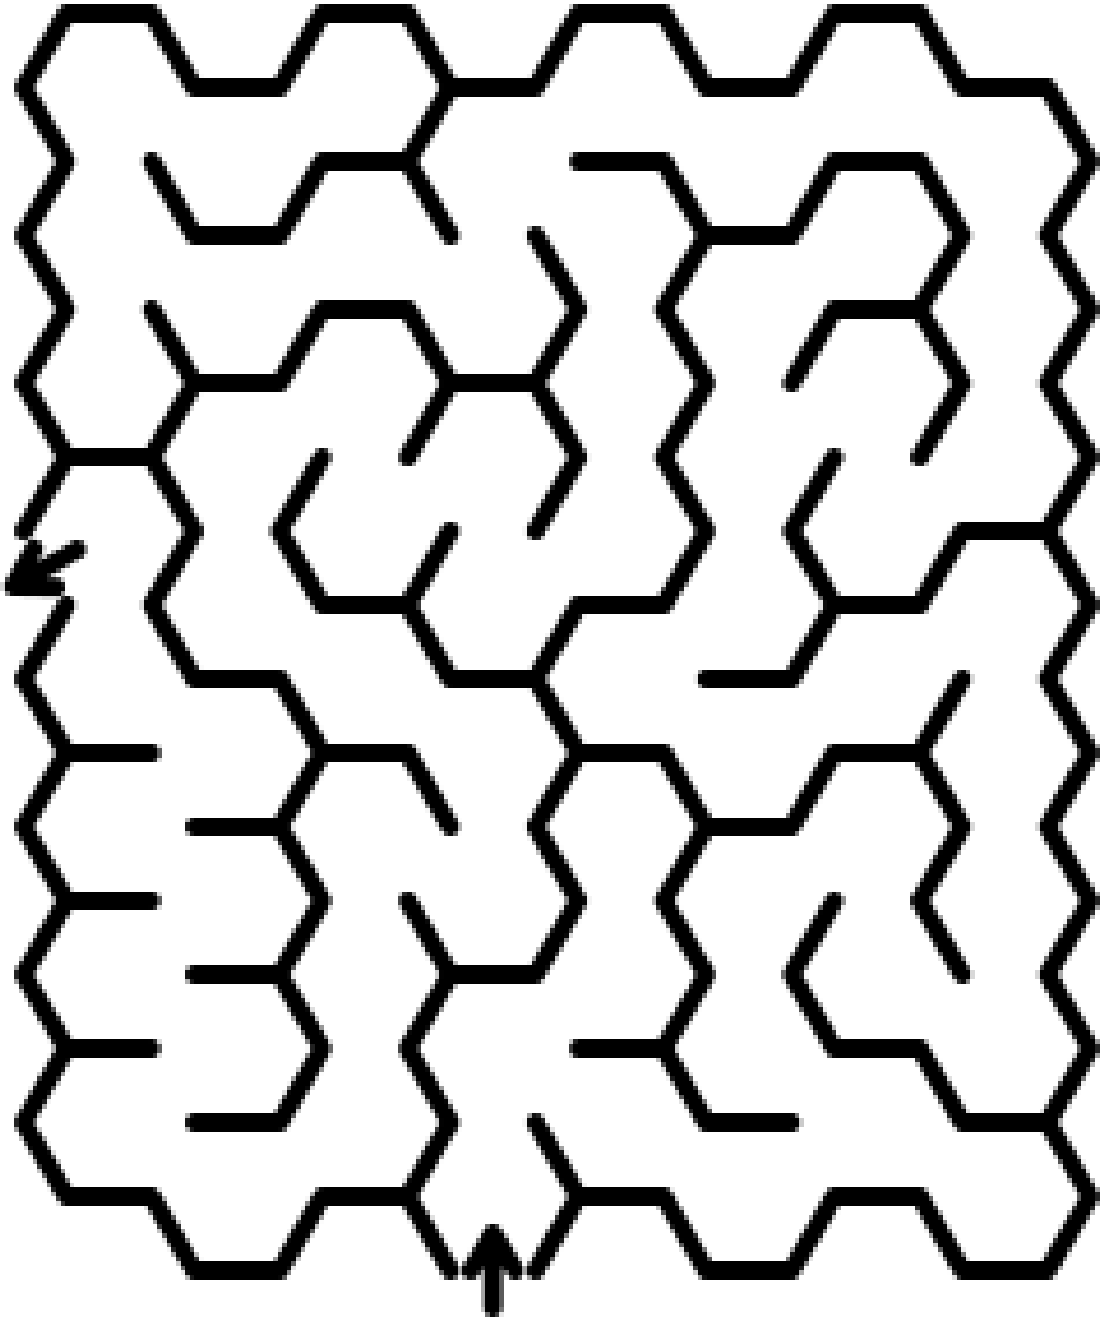

- Use a pencil so you can erase and try again.

- For harder mazes, try solving sections independently, then connect them.

Maze 1 — Orthogonal (Easy)

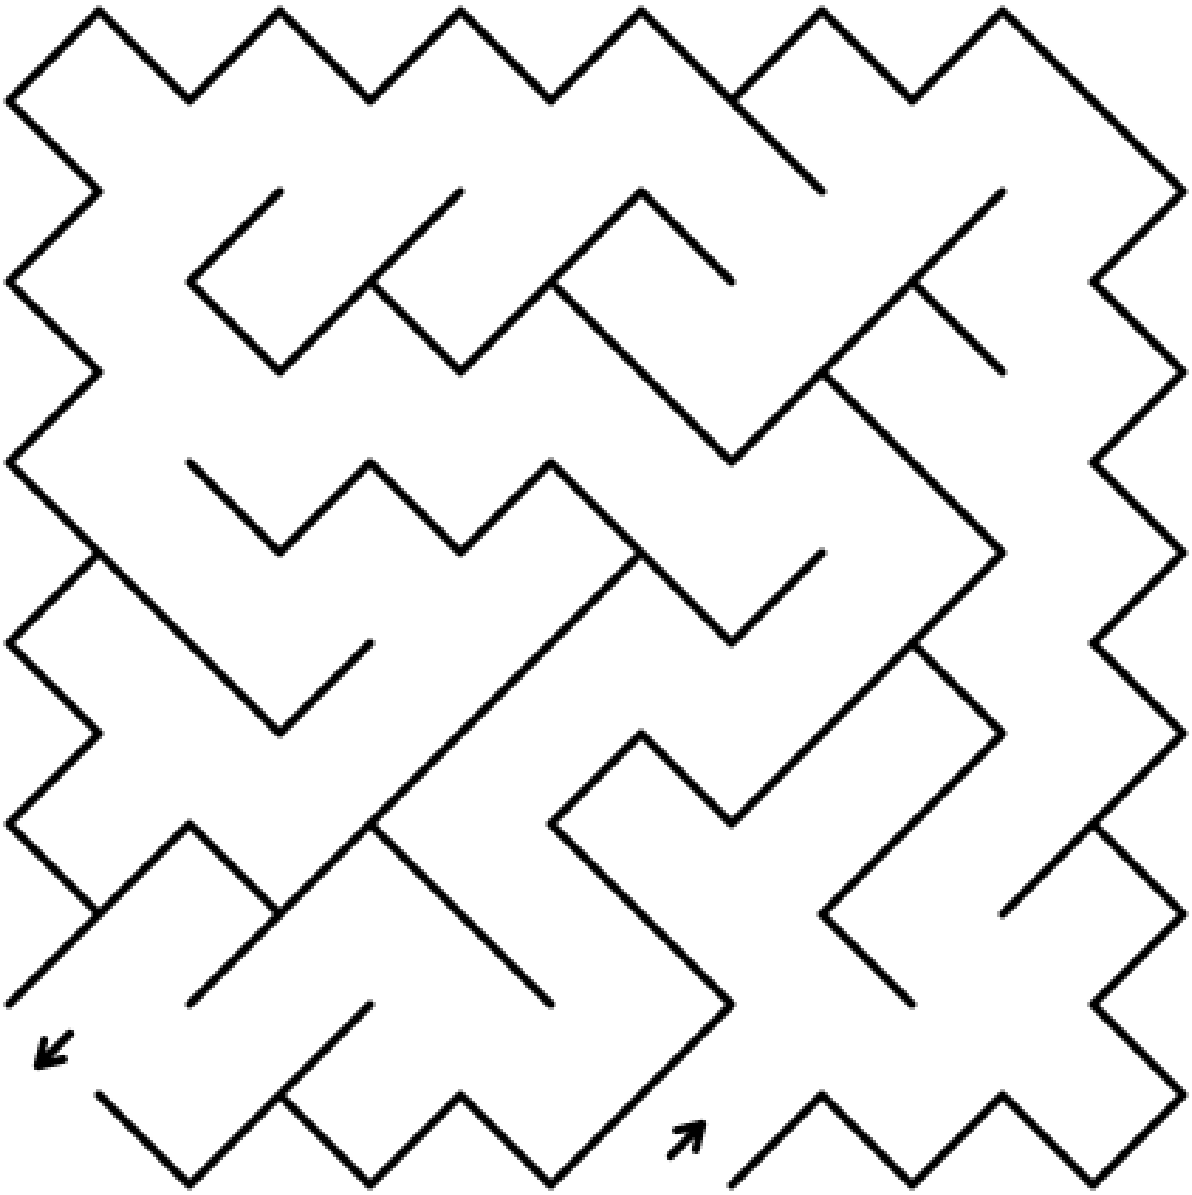

Maze 2 — Hexagonal (Easy)

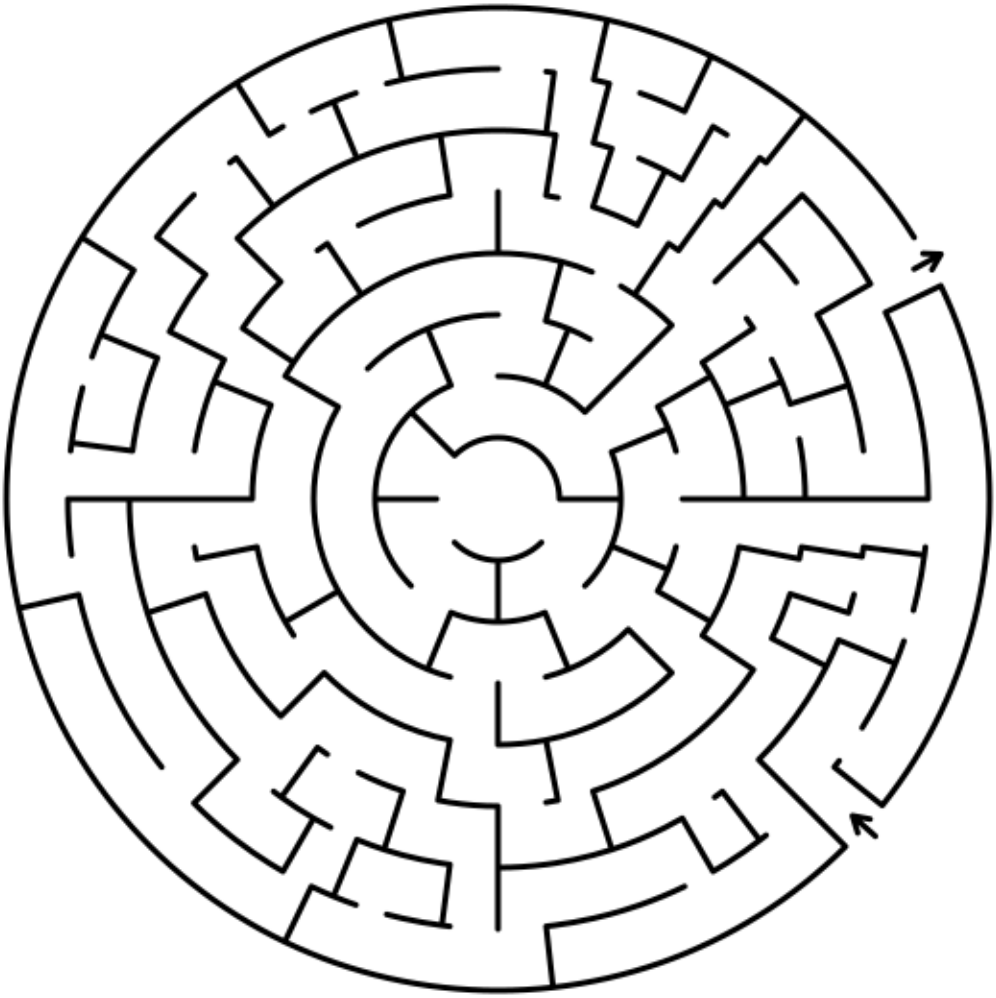

Maze 3 — Triangle (Easy)

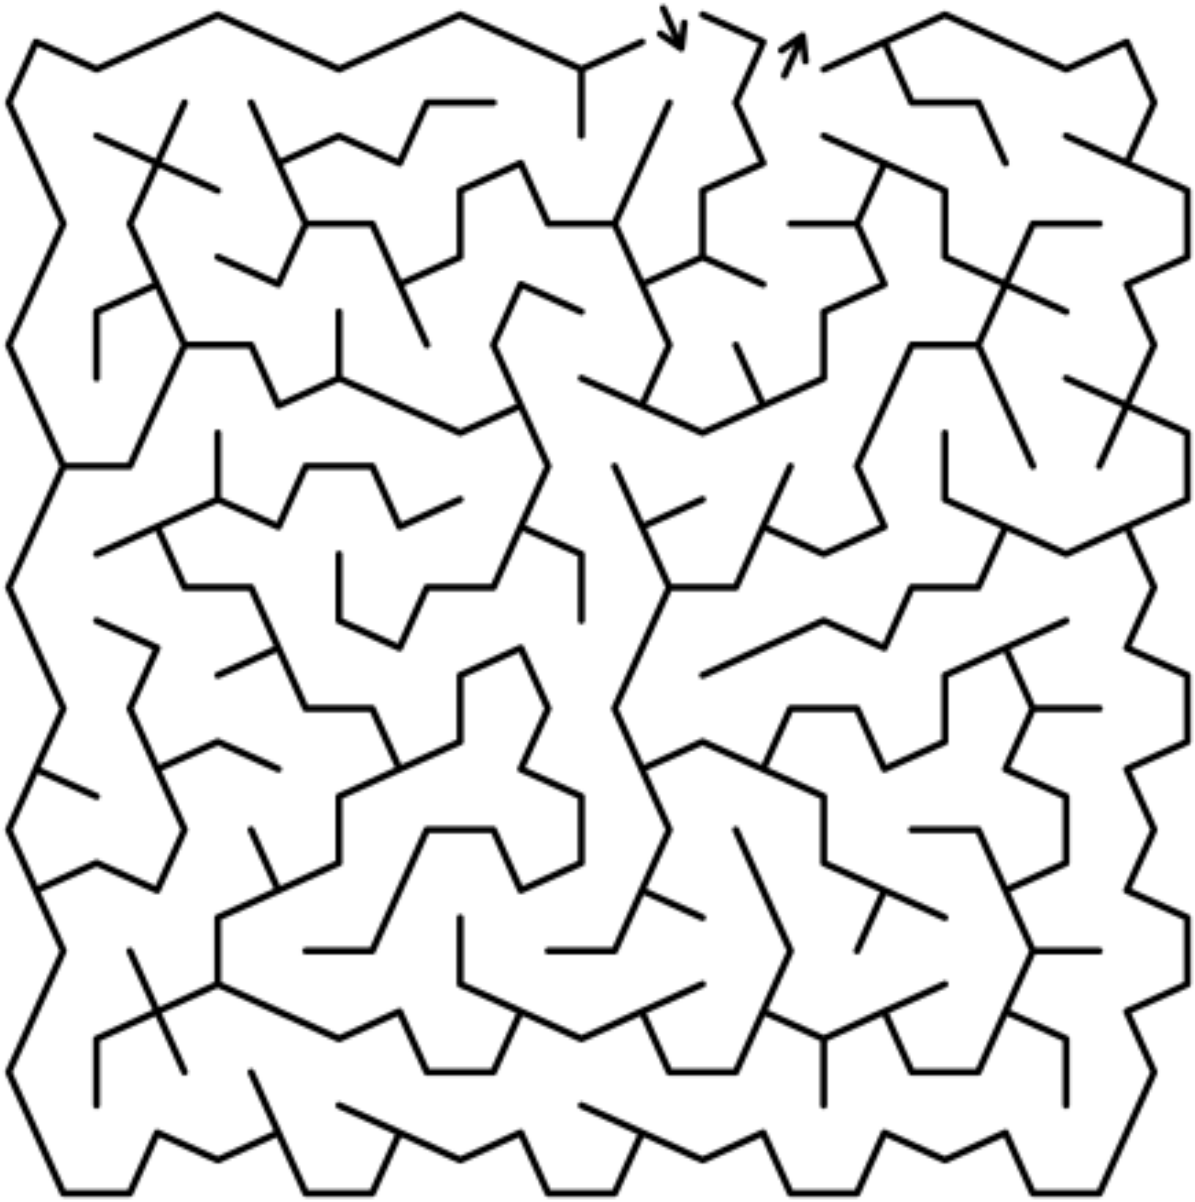

Maze 4 — Rhombic (Medium)

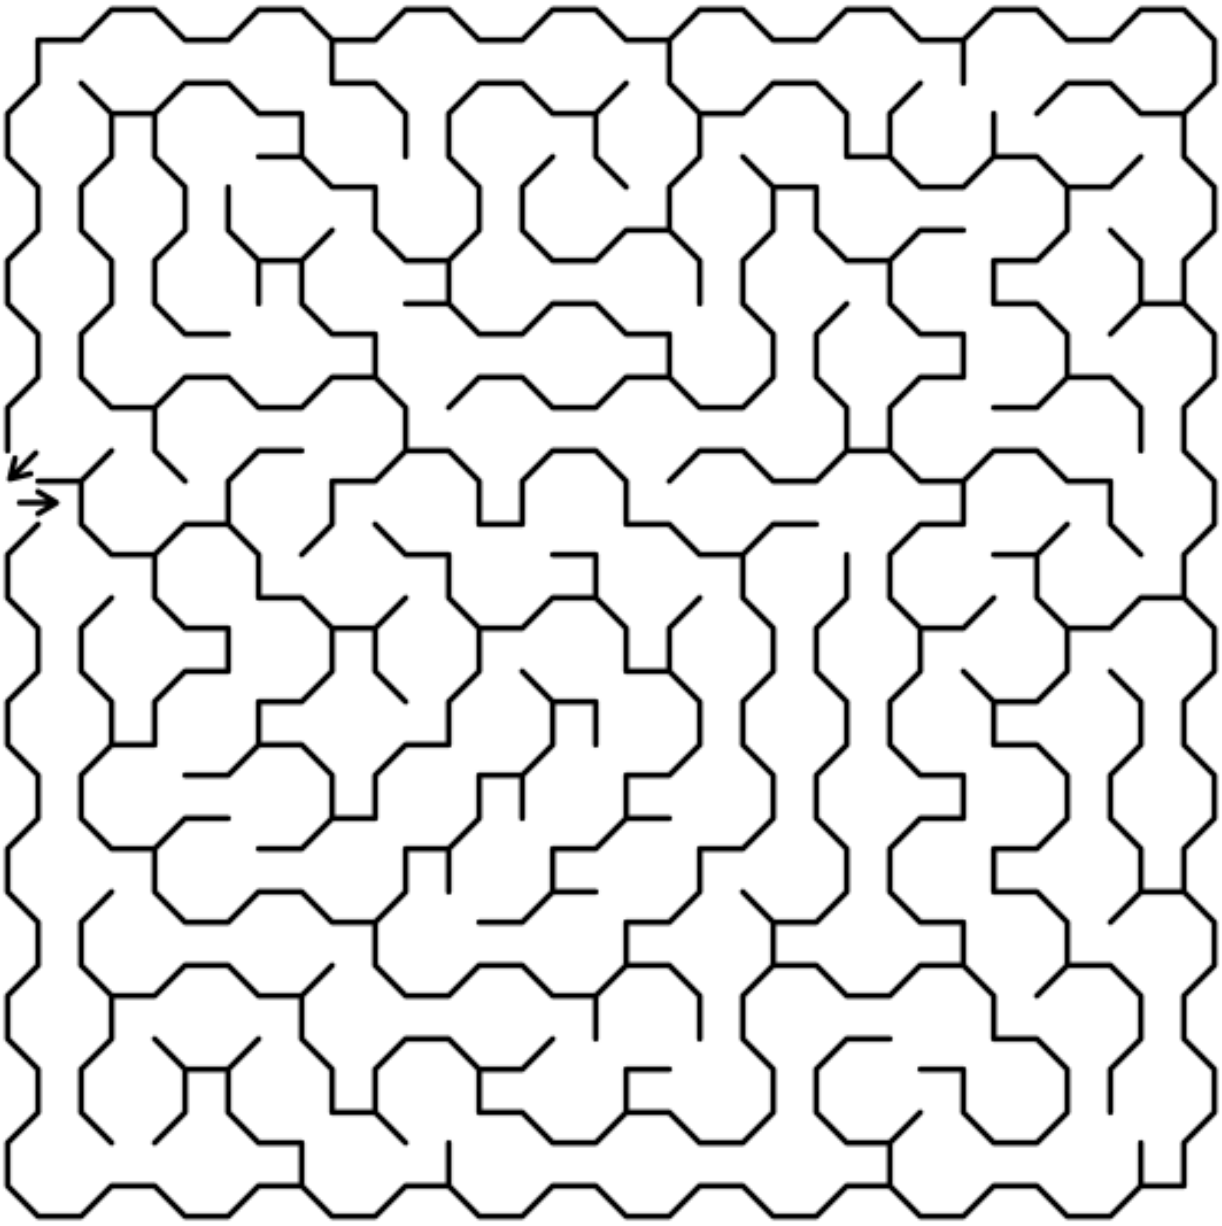

Maze 5 — Theta (Medium)

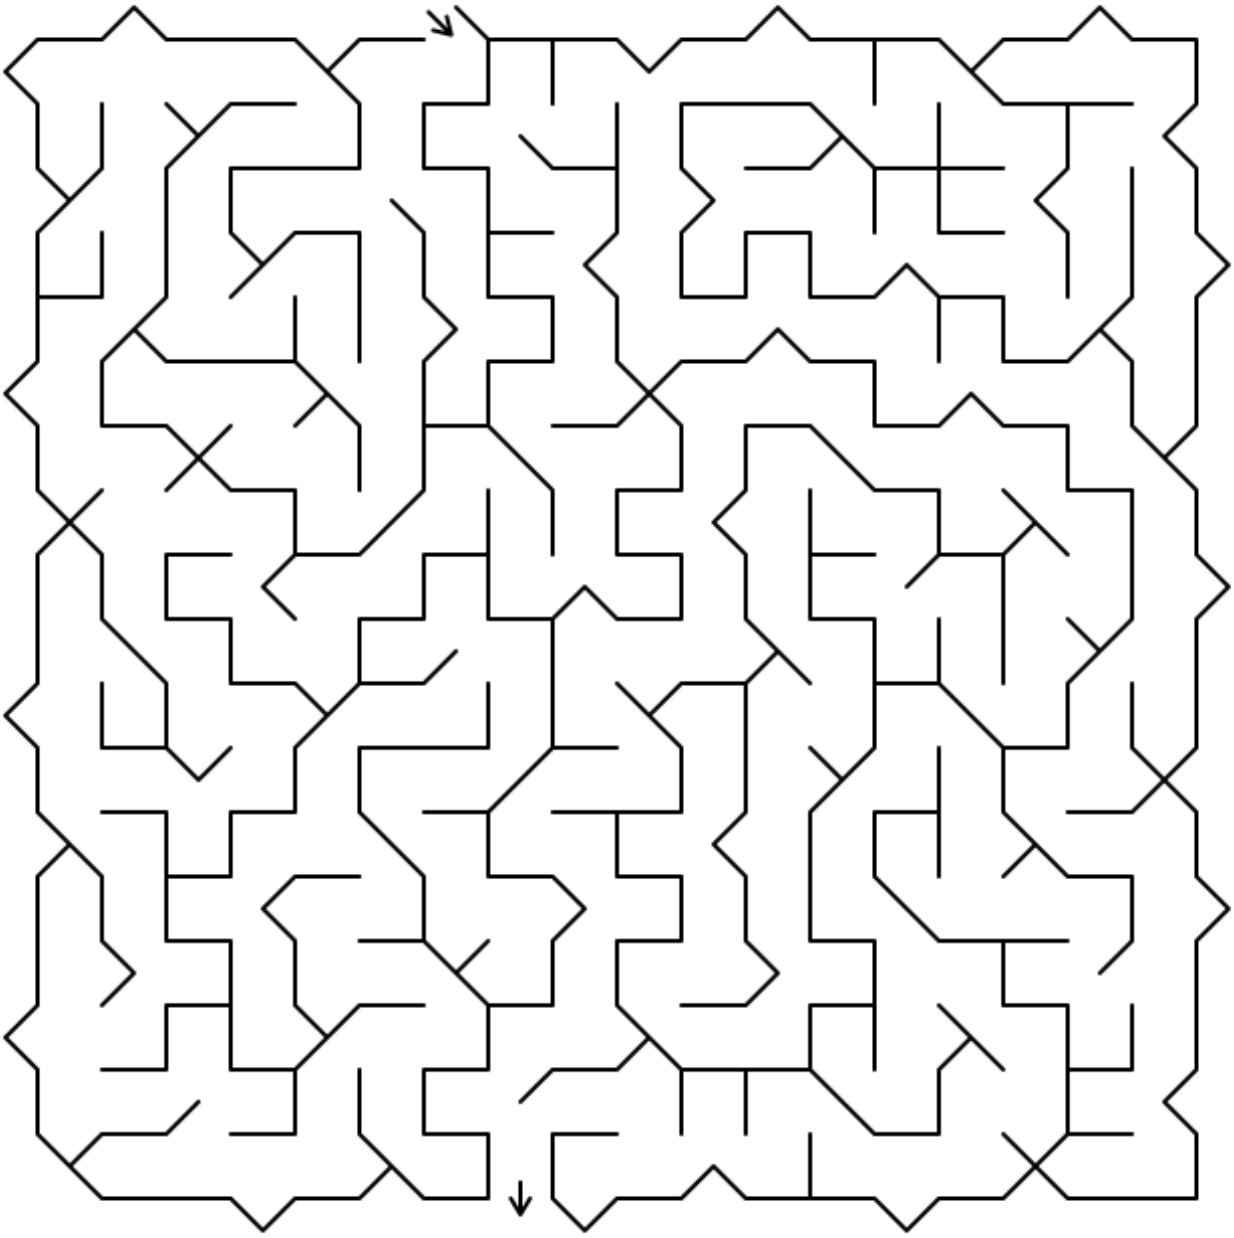

Maze 6 — Cairo (Medium)

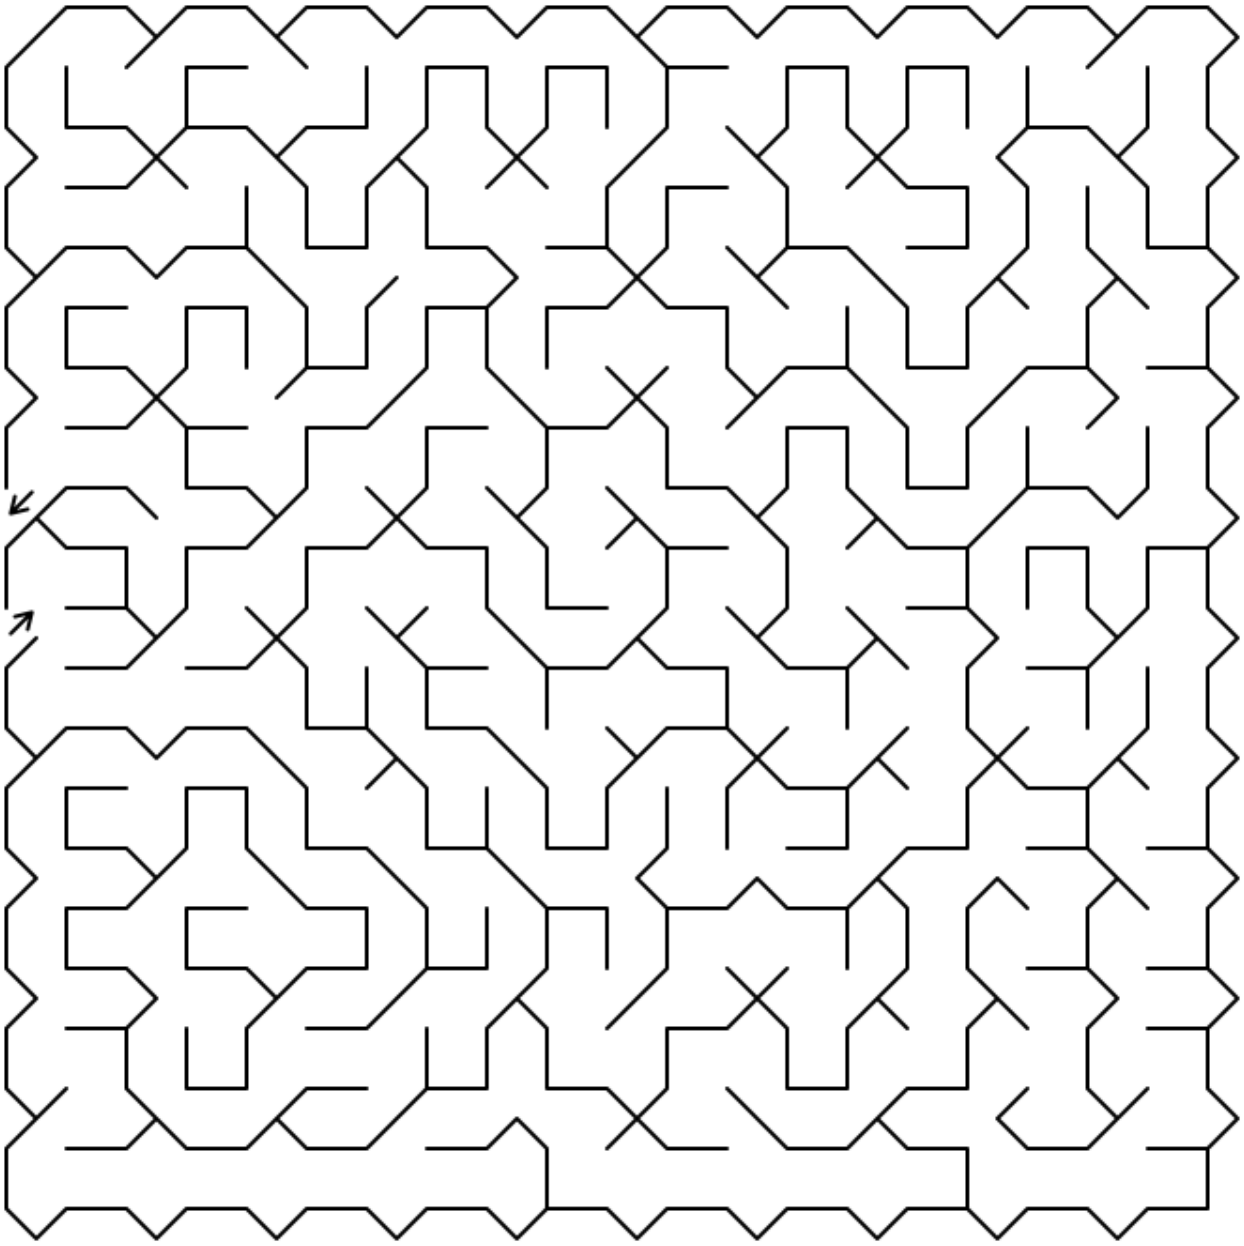

Maze 7 — Octagon-Square (Hard)

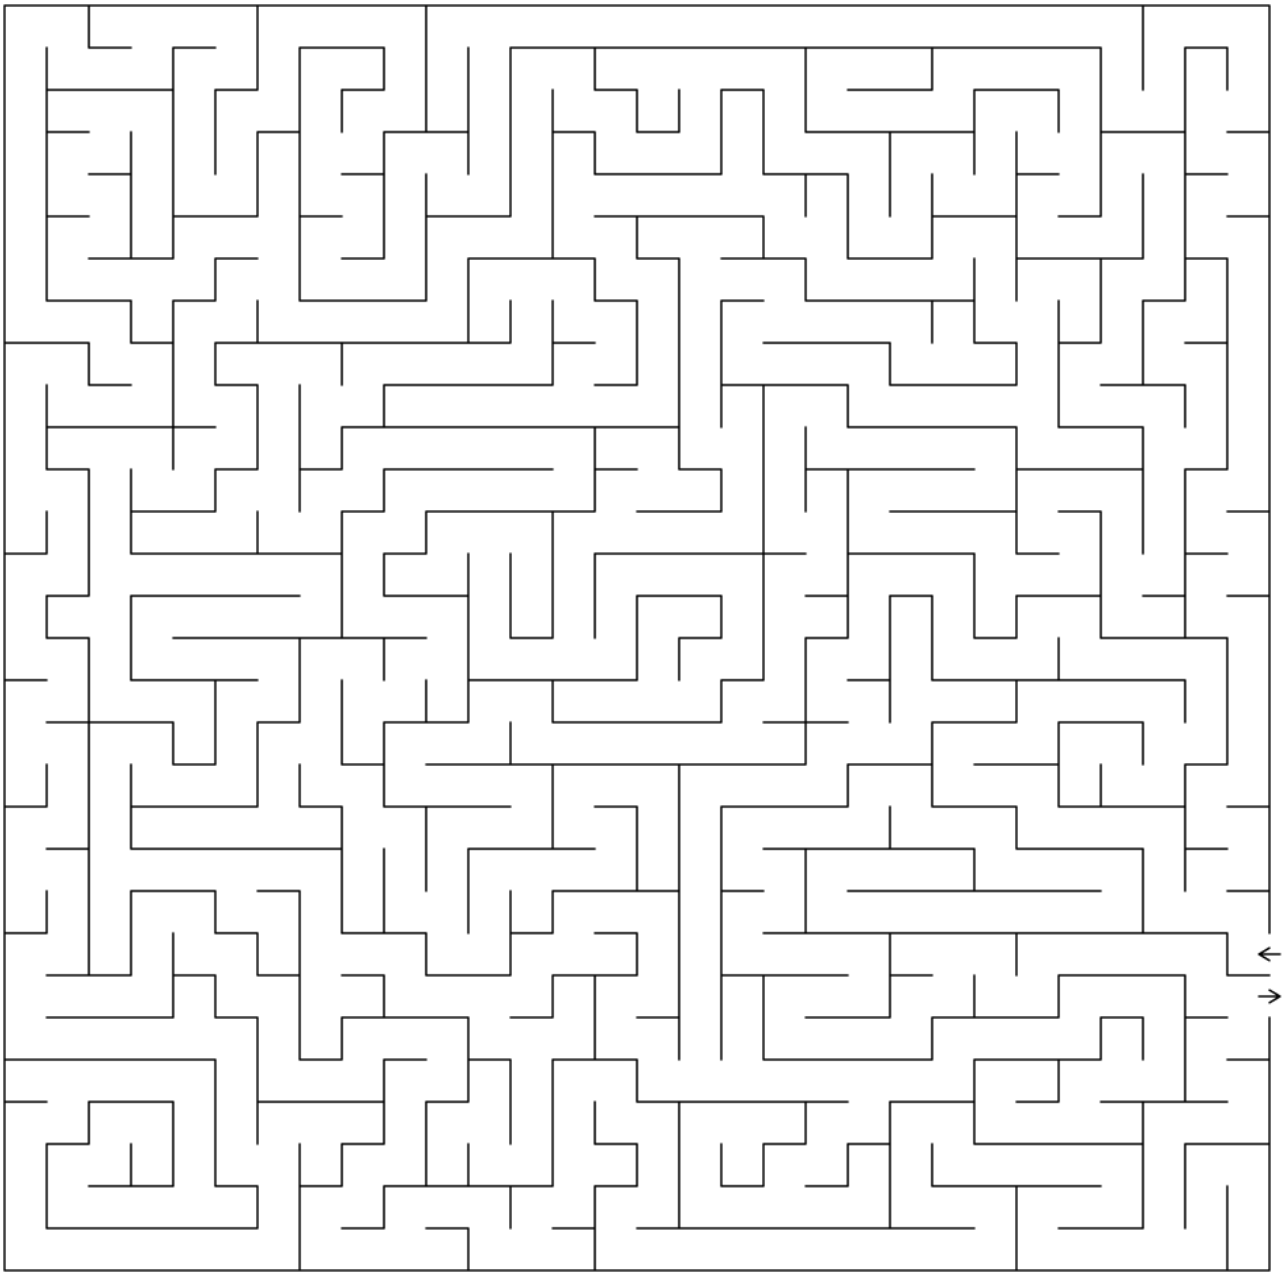

Maze 8 — Pentagon (Hard)

Maze 9 — Hexagonal-Square (Hard)

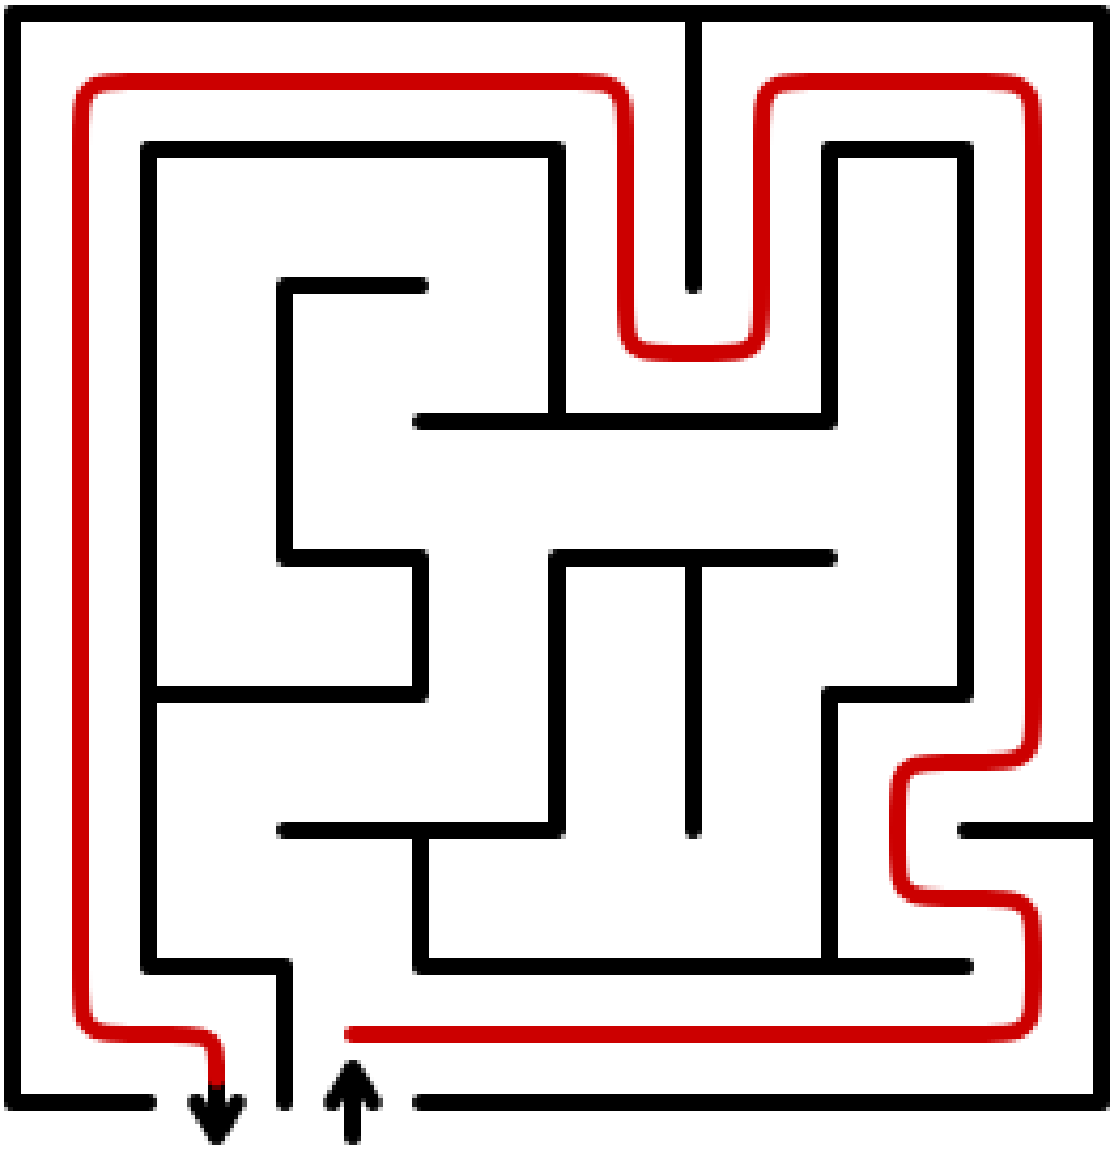

Maze 10 — Orthogonal (Expert)

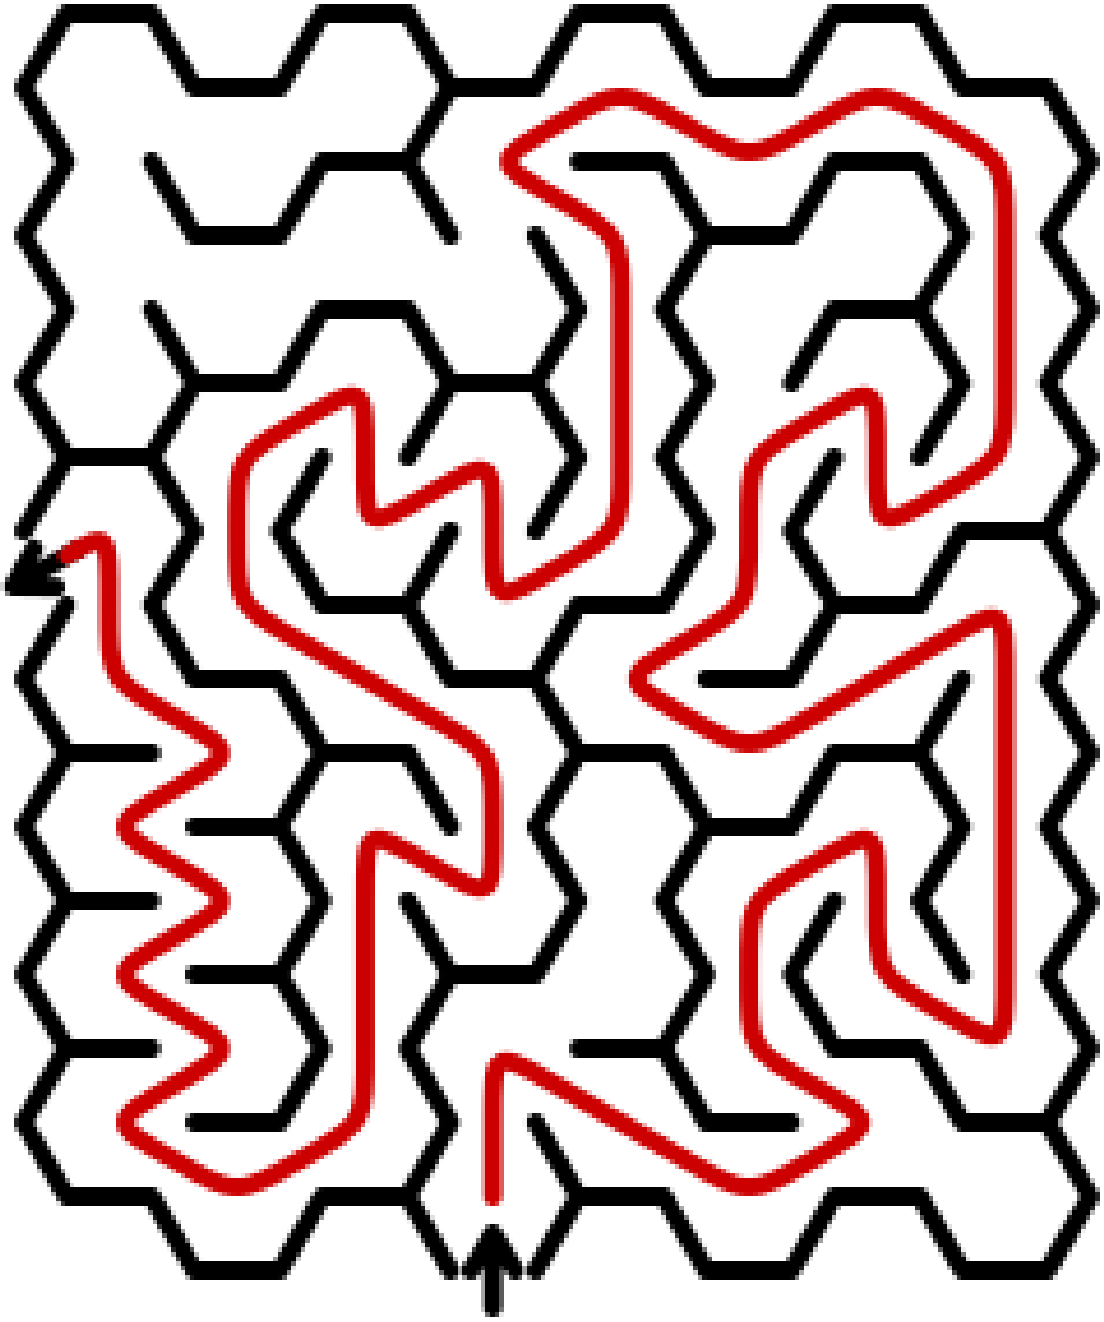

Solutions

Solutions Section

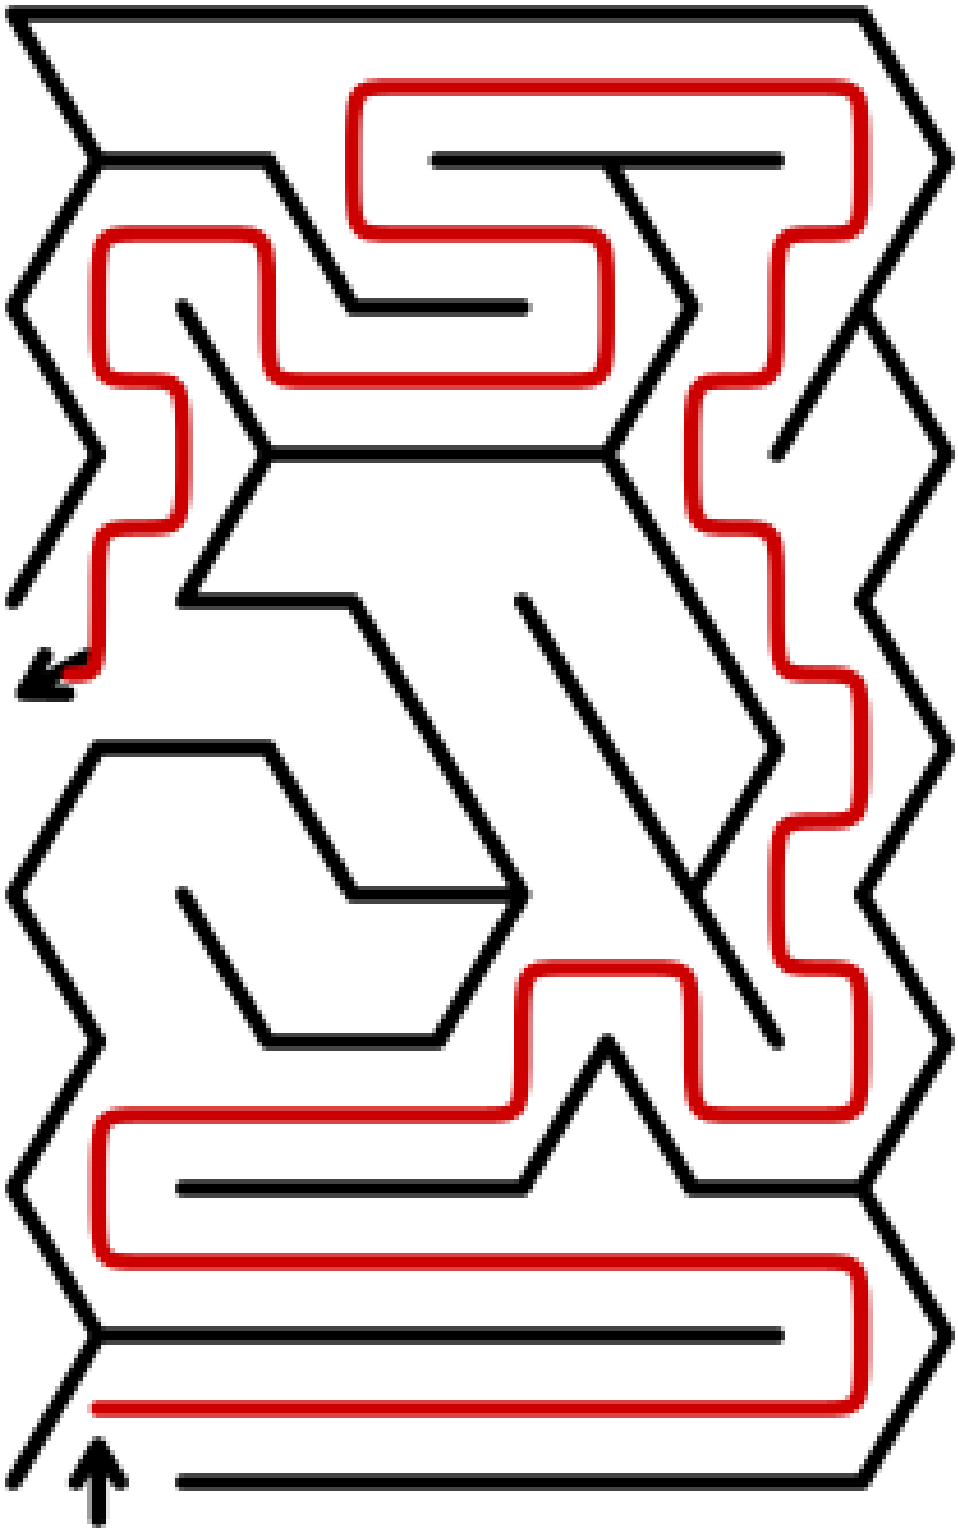

Solution 1 — Orthogonal

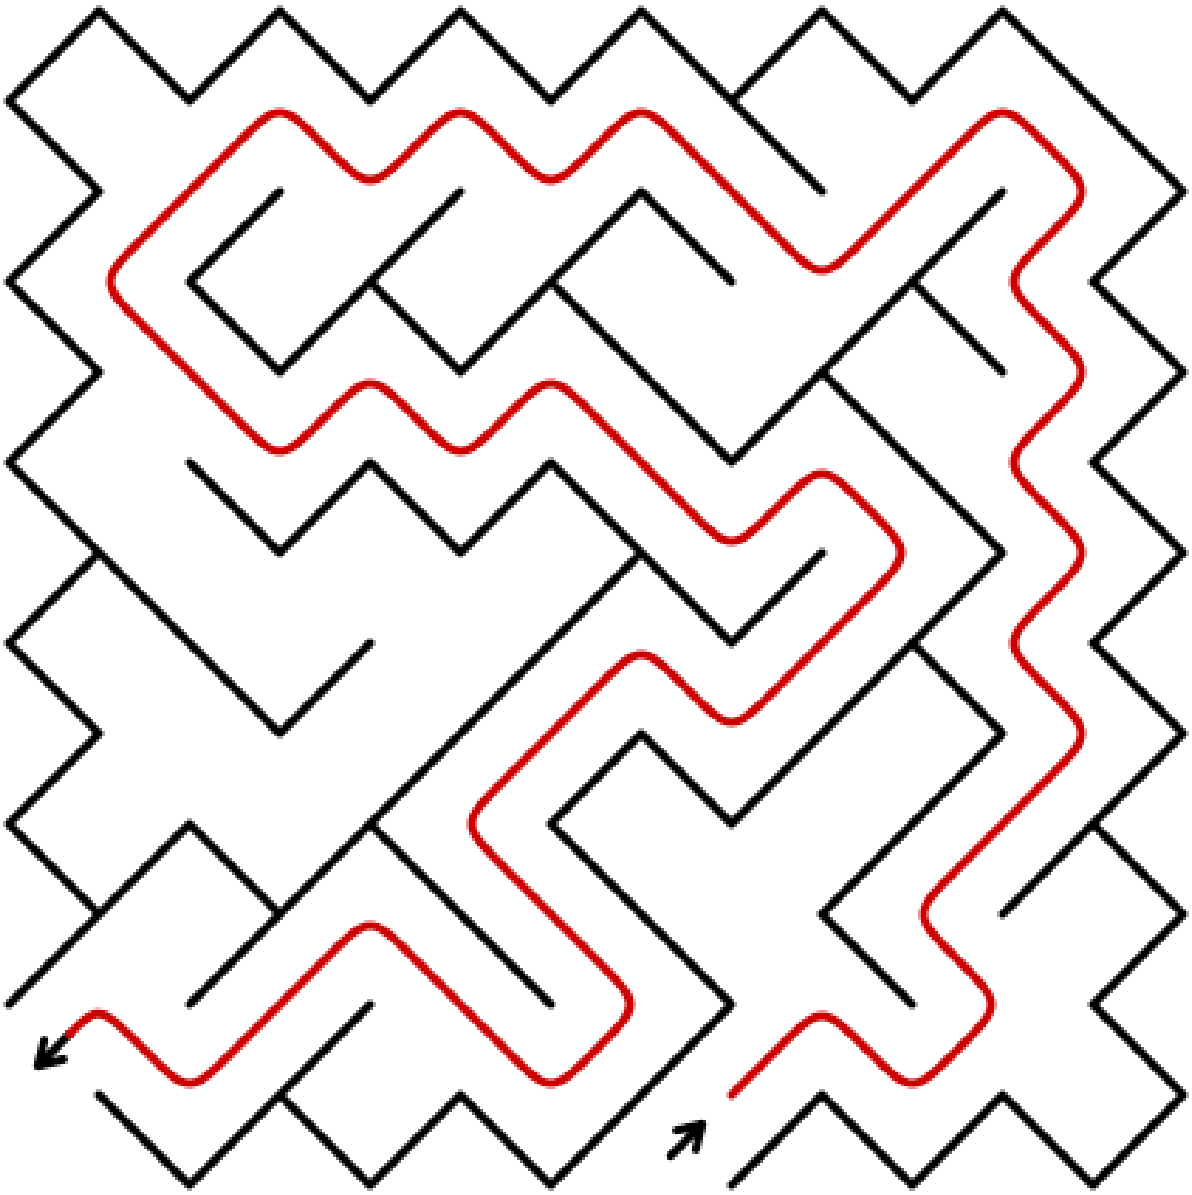

Solution 2 — Hexagonal

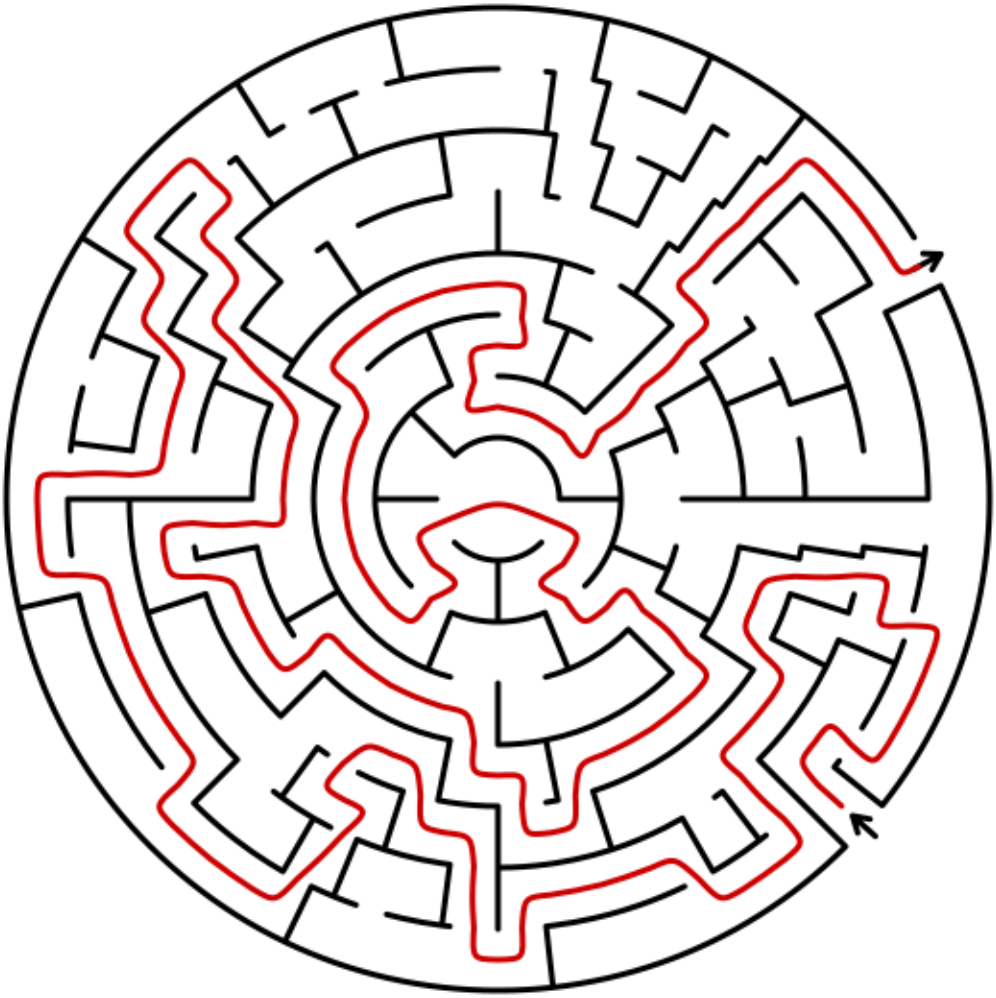

Solution 3 — Triangle

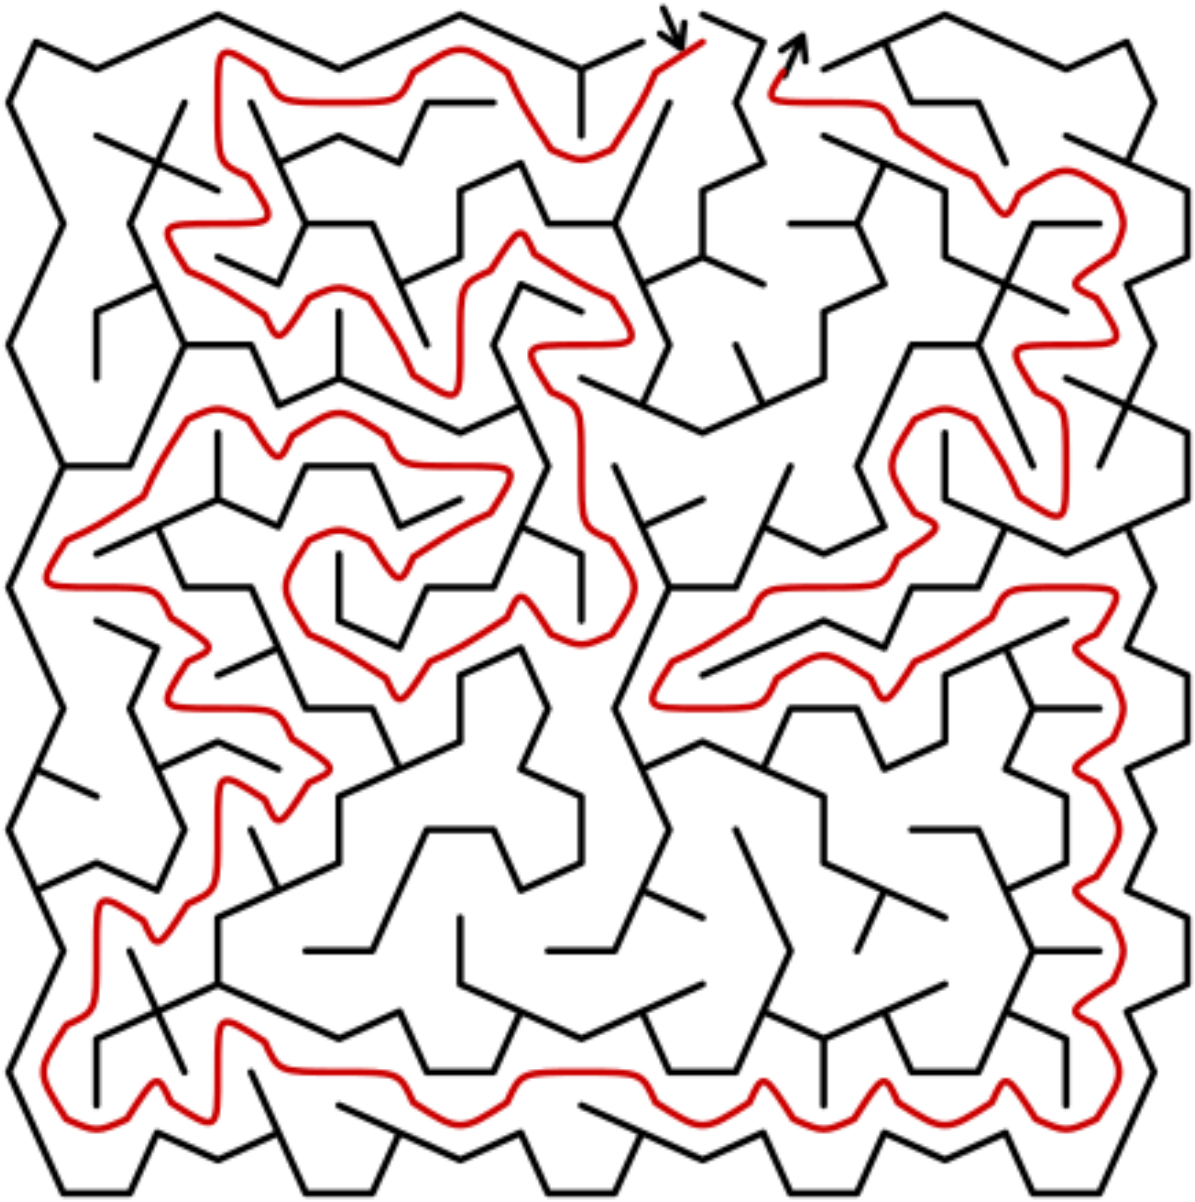

Solution 4 — Rhombic

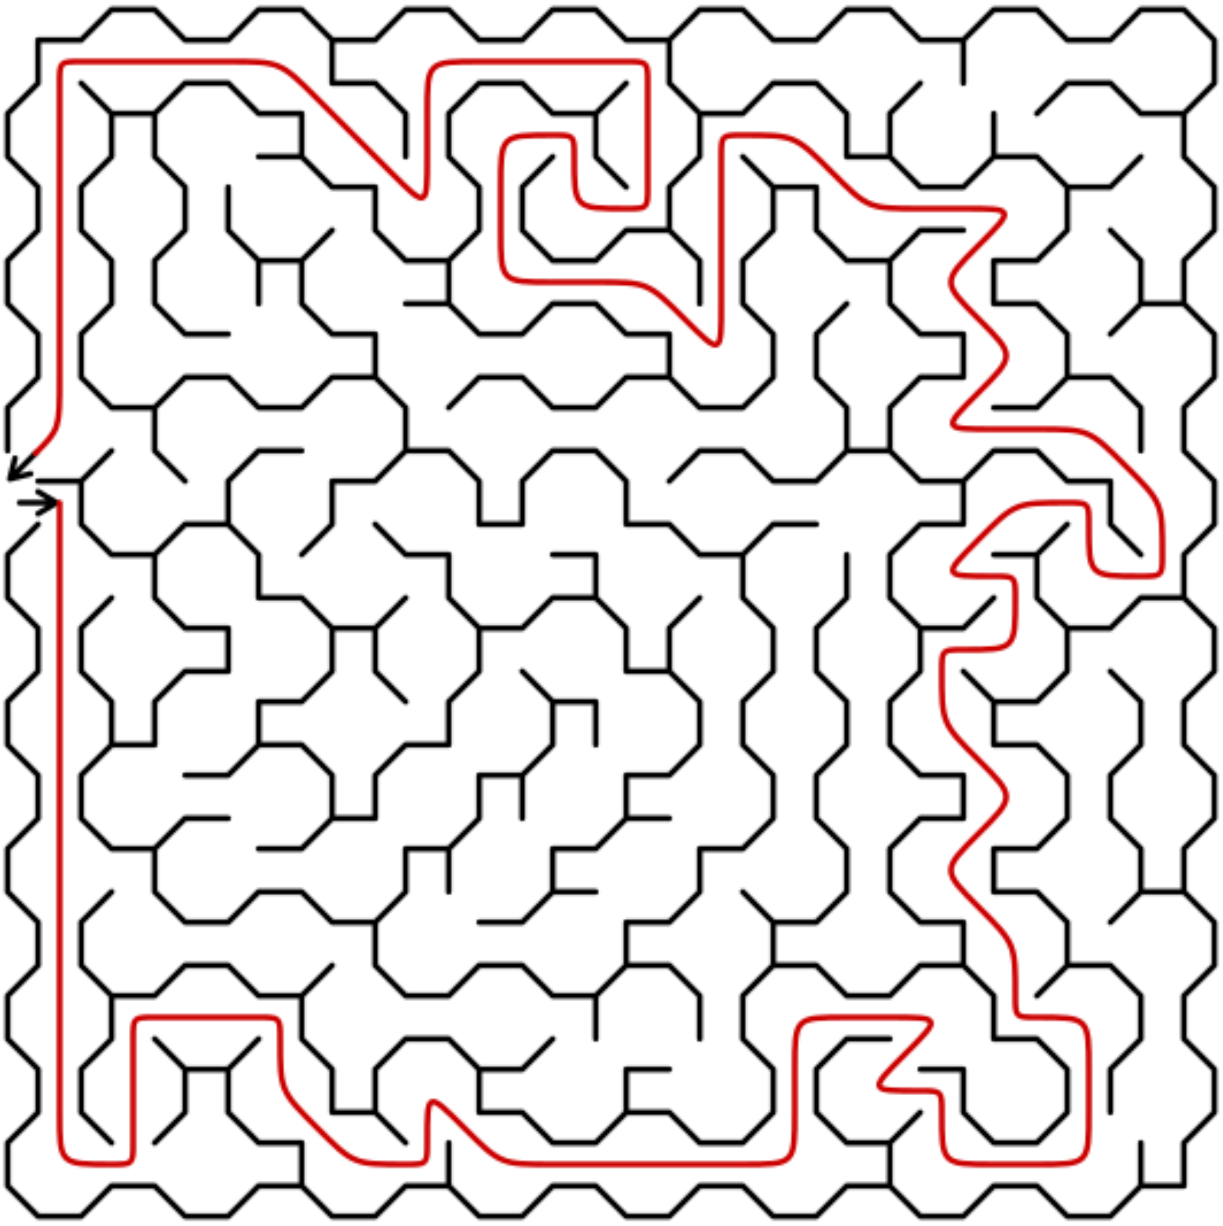

Solution 5 — Theta

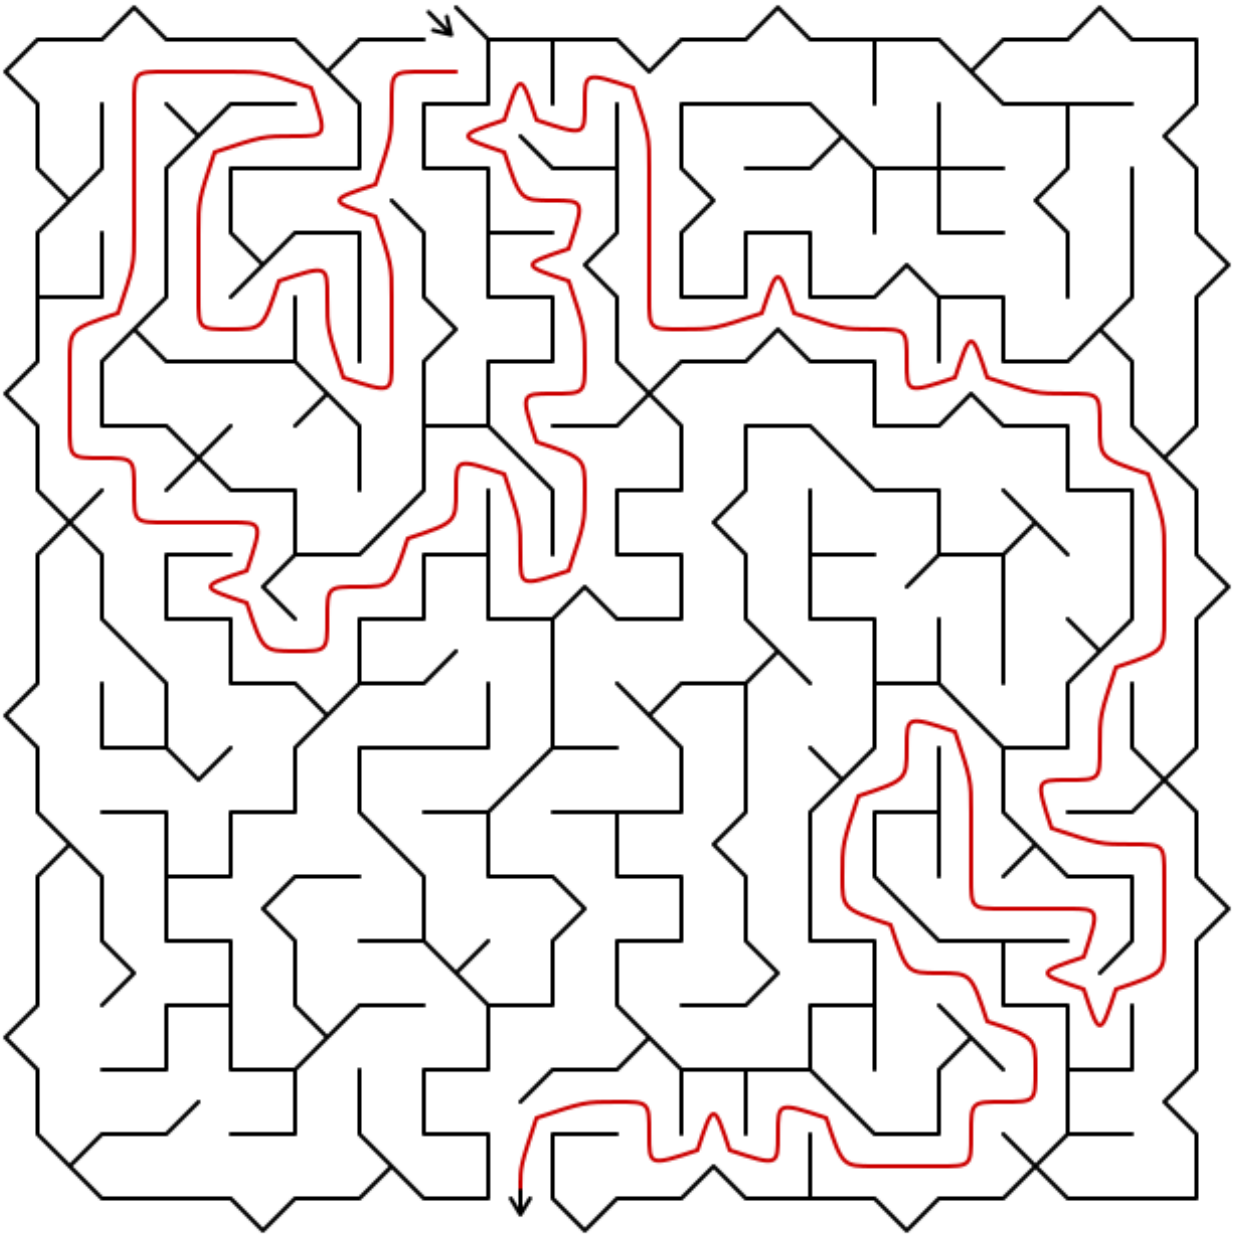

Solution 6 — Cairo

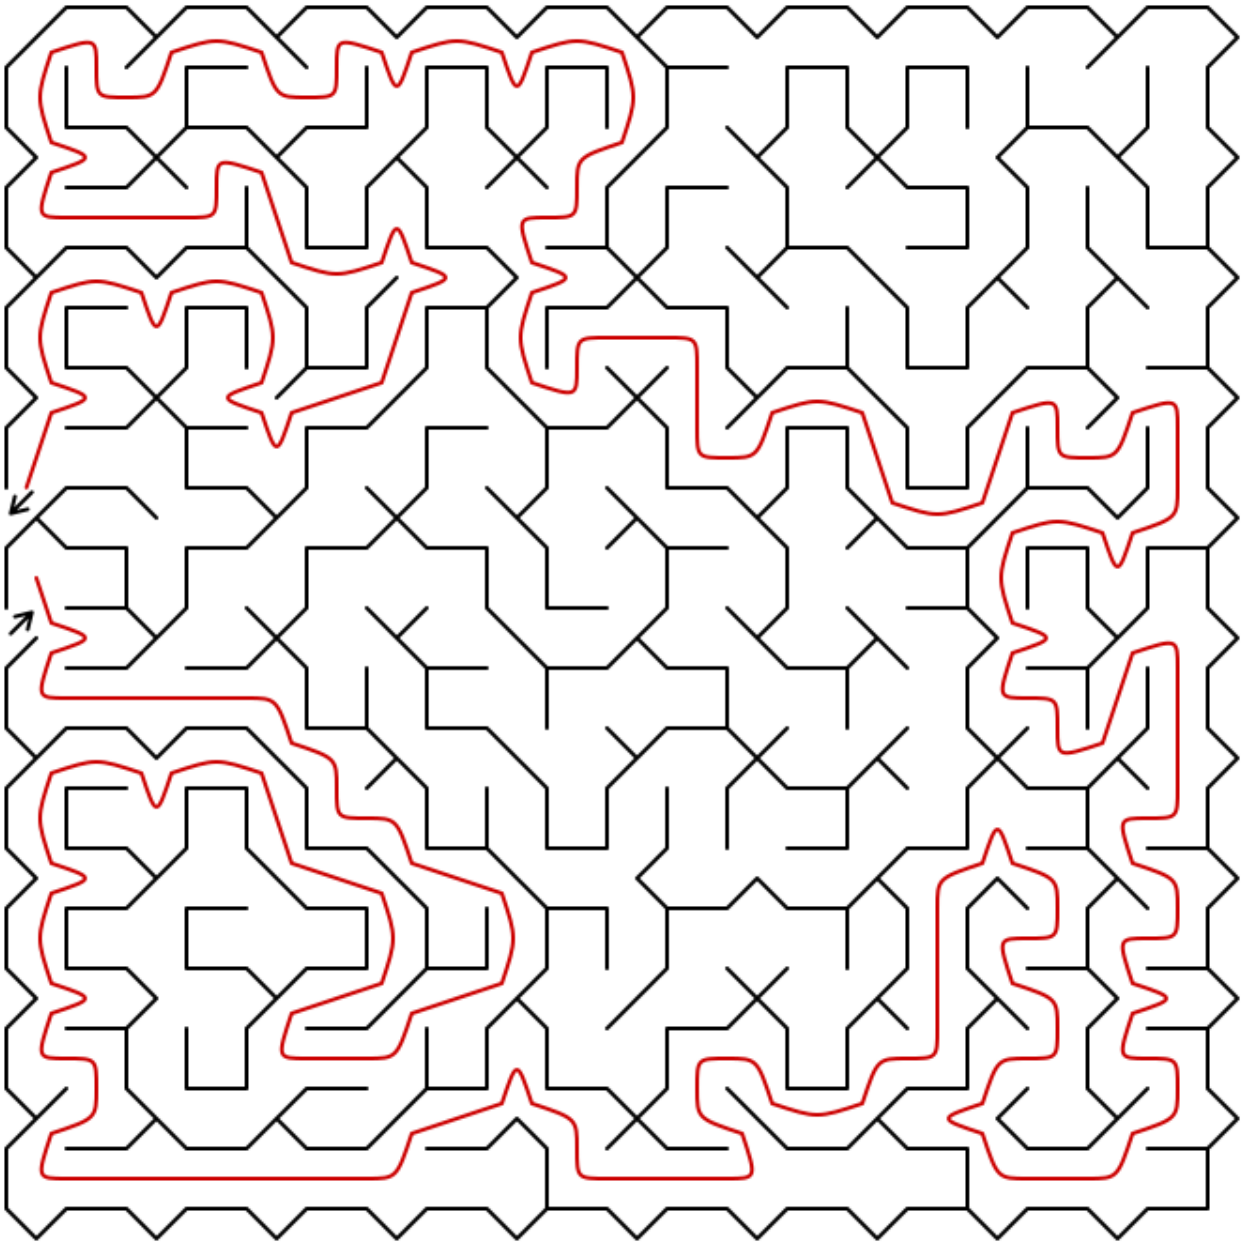

Solution 7 — Octagon-Square

Solution 8 — Pentagon

Solution 9 — Hexagonal-Square

Solution 10 — Orthogonal
